

Document 18 — Product Requirements Document (PRD)

Product Name: HQ

Tagline: Your AI Headquarters

Version: 1.0

Executive Summary

HQ is an AI-powered Executive Headquarters that enables creators, founders, startups, agencies, and businesses to accomplish complex work by collaborating with a board of specialized AI executives.

Rather than interacting with a single AI assistant, users assign missions to an Executive Board that plans, delegates, collaborates, reviews, and delivers professional results.

This Product Requirements Document (PRD) defines the complete functional and non-functional requirements for HQ Version 1.0.

Product Vision

Build the world's most intelligent AI Headquarters where specialized AI executives collaborate to help people achieve more than any single AI assistant can accomplish alone.

Mission Statement

Empower individuals and organizations with an intelligent executive team capable of planning, collaborating, reasoning, and delivering high-quality business outcomes.

Problem Statement

Today's AI tools present several challenges:

- Users repeatedly provide the same context.
- One AI handles every task regardless of expertise.
- Collaboration between specialized domains is missing.
- Workflows are disconnected.
- Outputs often require significant manual coordination.

HQ addresses these problems by introducing a structured Executive Board with defined responsibilities and coordinated execution.

Product Goals

The first release should:

- Deliver a polished Executive Board experience.
- Simplify complex workflows.
- Demonstrate multi-executive collaboration.
- Provide professional-quality outputs.
- Validate product-market fit.
- Establish the foundation for long-term growth.

Business Goals

- Launch HQ Version 1.0.
- Acquire early adopters.
- Validate subscription pricing.
- Build a community.
- Collect customer feedback.
- Prepare for commercial expansion.

Target Users

Primary Users

- Content Creators
- Startup Founders
- Solopreneurs
- Marketing Teams
- Creative Agencies
- Small Businesses

Secondary Users

- Medium Businesses
- Enterprises
- Consultants
- Educational Organizations

User Personas

Creator

Needs:

- Fast content creation
- Campaign planning

- Brand consistency

Success:

Produces more high-quality content in less time.

Founder

Needs:

- Strategic planning
- Product advice
- Market research
- Investor preparation

Success:

Makes better business decisions with AI support.

Agency

Needs:

- Client management
- Campaign execution
- Team collaboration

Success:

Delivers work faster while maintaining quality.

Core Value Proposition

Instead of asking one AI to do everything,

HQ coordinates a team of AI executives that collaborate like a professional leadership team.

Functional Requirements

Authentication

Users can:

- Register

- Login
- Reset passwords
- Verify email
- Manage sessions

Headquarters

Users can:

- Create Headquarters
- Edit Headquarters
- Configure branding
- Manage organization settings

Executive Board

The platform provides:

- CEO
- Chief of Staff
- Marketing Director
- Content Director

- Creative Director
- Design Director
- Research Director
- Finance Director
- Sales Director
- Operations Director
- Analytics Director
- Legal & Compliance Director
- Customer Success Director
- Technology Director
- Product Director
- Innovation Director
- Security Director
- HR & Talent Director
- Partnerships Director

Each executive has defined responsibilities and collaboration rules.

Mission Control

Users can:

- Create missions
- Edit missions

- Pause missions
- Resume missions
- Cancel missions
- Track mission progress

AI Collaboration

The Executive Board should:

- Analyze requests.
- Plan execution.
- Delegate work.
- Collaborate across departments.
- Review deliverables.
- Produce unified outputs.

Asset Library

Support:

- Images
- Documents

- Videos
- Brand Assets
- Generated Content

Billing

Support:

- Free Plan
- Pro Plan
- Subscription management
- Payment history

Analytics

Provide:

- Mission statistics
- AI usage
- Executive activity
- Productivity metrics

Non-Functional Requirements

The system should be:

- Reliable
- Secure
- Responsive
- Accessible
- Scalable
- Maintainable
- Extensible
- Observable

Performance Requirements

Target:

- Fast dashboard loading
- Responsive interactions
- Efficient AI processing
- Stable API performance

Performance should remain acceptable as user volume increases.

Security Requirements

Implement:

Authentication

Authorization

Organization isolation

Encryption

Audit logging

Secure file handling

AI safety controls

Accessibility Requirements

Support:

Keyboard navigation

Screen readers

High contrast

Reduced motion

Responsive layouts

Accessibility is required for production readiness.

User Stories

Authentication

As a user,

I want to create an account,

so I can access my Headquarters securely.

Mission Management

As a founder,

I want to create missions,

so my Executive Board can coordinate work.

AI Collaboration

As a creator,

I want multiple executives to collaborate,

so I receive higher-quality outputs.

Asset Management

As a marketer,

I want generated assets stored,

so I can reuse them later.

Billing

As a customer,

I want to upgrade my subscription,

so I can unlock premium capabilities.

Acceptance Criteria

Authentication

Users can register.

Users can log in.

Sessions remain secure.

Mission Control

Missions progress through defined stages.

Status updates appear correctly.

Executive Board

Executives perform assigned responsibilities.

Collaboration functions correctly.

Billing

Users can subscribe successfully.

Subscription status updates accurately.

Analytics

Dashboard displays meaningful metrics.

Feature Prioritization

Must Have

Authentication

Headquarters

Executive Board

Mission Control

AI Collaboration

Billing

Dashboard

Responsive Design

Should Have

Notifications

Analytics

Asset Library

Executive Activity Feed

Could Have

Voice Commands

Workflow Templates

Executive Customization

Won't Have (Version 1.0)

Marketplace

Mobile Application

Enterprise Administration

Advanced Workflow Automation

These features are planned for future releases.

Technical Constraints

Version 1.0 uses:

Frontend

Next.js

Backend

NestJS

Database

PostgreSQL

Infrastructure

Google Cloud Platform

AI

Gemini API

Storage

Cloud Storage

Authentication

Firebase Authentication

Success Metrics

Measure:

Registered users

Active users

Missions created

Mission completion rate

AI utilization

Subscription conversions

User retention

Customer satisfaction

Risks

Potential risks include:

AI response inconsistency

Scope expansion

Infrastructure cost

Performance bottlenecks

Prompt quality

Third-party API limits

Mitigation plans should be reviewed continuously.

Assumptions

This PRD assumes:

Users understand AI-assisted workflows.

Internet connectivity is available.

AI services remain operational.

Infrastructure scales appropriately.

Release Scope

HQ Version 1.0 delivers:

Executive Headquarters

AI Executive Board

Mission Control

Content Generation

Subscription System

Analytics Dashboard

Future releases extend the platform without changing the core architecture.

Traceability

This PRD references:

Product Vision

System Architecture

Executive Organization

API Blueprint

Frontend Blueprint

Security Blueprint

Testing Blueprint

Launch Strategy

AI Orchestration Blueprint

Together, these documents define HQ Version 1.0.

Success Criteria

The Product Requirements Document succeeds when:

Engineering understands what to build.

Design understands what to create.

Product understands release scope.

Stakeholders understand business objectives.

Development remains aligned with the overall vision.

Conclusion

The HQ Product Requirements Document serves as the authoritative reference for Version 1.0.

It aligns product vision, business goals, engineering requirements, design principles, AI capabilities, and operational expectations into a single implementation guide, ensuring every team member contributes toward the same product vision.
