

Engineering Document E09 — Authentication & Organization Onboarding Blueprint

Product Name: HQ

Engineering Package: Version 1.0

Purpose

This document defines the complete authentication, onboarding, organization creation, and first-run experience for HQ.

The objective is not simply to authenticate users, but to transform a new visitor into an active HQ organization owner within minutes.

The onboarding experience should immediately demonstrate the value of an AI Executive Headquarters.

Guiding Principles

The onboarding experience should be:

- Fast
- Professional
- Interactive
- Personalized
- Educational
- Memorable

A user should understand HQ before exploring the rest of the application.

Authentication Stack

Authentication Provider

- Firebase Authentication

Supported Sign-in Methods

- Google
- Email & Password
- Magic Link (Future)
- Microsoft (Future)
- GitHub (Future)

Session Management

- Firebase ID Tokens
- Secure HTTP-only session cookies
- Automatic token refresh

Authorization

- Role-Based Access Control (RBAC)
-

User Journey

Landing Page

Authentication

Create Organization

Create Headquarters

Select Industry

Choose Business Goals

Meet Executive Board

Create First Mission

Mission Executes

Enter HQ Workspace

Step 1 — Authentication

The login page should be clean and focused.

Available actions:

- Continue with Google
- Continue with Email
- Create Account
- Forgot Password

After successful authentication:

- Verify identity
- Create user if new
- Redirect to onboarding

Step 2 — Create Organization

The user creates their organization.

Required information:

- Organization Name
- Organization Slug
- Country
- Time Zone
- Preferred Language

Optional:

- Website
 - Logo
 - Brand Colors
-

Step 3 — Create Headquarters

The user names their AI Headquarters.

Examples:

- Acme HQ
- Creative HQ
- Growth HQ

Configuration includes:

- Headquarters Name
- Industry
- Team Size
- Business Stage

This becomes the user's permanent AI workspace.

Step 4 — Business Profile

HQ personalizes recommendations.

Information collected:

Industry

Examples:

- Marketing
- Technology
- Education
- E-commerce
- Finance
- Healthcare
- Consulting
- Media

Primary Goals

Examples:

- Create Content
 - Grow Revenue
 - Build Products
 - Marketing
 - Research
 - Customer Support
-

Step 5 — AI Executive Introduction

The Executive Board welcomes the user.

Executives introduce themselves.

Each executive explains:

- Department
- Responsibilities
- How they contribute
- Example tasks

The goal is to make the AI team feel like real executives.

Step 6 — Configure AI Preferences

Users choose:

- Response Style
- Creativity Level
- Preferred Language
- Tone of Voice
- Default Output Formats

Preferences can be updated later.

Step 7 — Guided First Mission

Every new organization completes one guided mission.

Example:

"Create a one-week social media campaign."

Workflow:

CEO

Chief of Staff

Marketing Director

Creative Director

Content Director

Review

Approval

Users watch the collaboration happen live.

Step 8 — Mission Results

The user receives:

- Executive Summary
- Deliverables
- Assets
- Recommendations
- Next Steps

The first success should occur within minutes.

Step 9 — Enter HQ

After the mission:

The Executive Headquarters opens.

Dashboard displays:

- Active Organization
- Executive Board
- Mission History
- Analytics
- Quick Actions

The user is immediately productive.

Organization Roles

Default roles:

Owner

Admin

Manager

Member

Viewer

Permissions increase according to role.

Invitation System

Organization owners can invite members.

Invitation flow:

Invite

Email

Accept

Join Organization

Assign Role

Authentication Security

Requirements:

- Email verification
- Secure token validation
- Device tracking
- Suspicious login detection
- Password reset
- Session expiration

Future:

- Multi-Factor Authentication (MFA)
-

Session Management

Users can:

- View active sessions
- Sign out individual devices
- Sign out all devices

Inactive sessions expire automatically.

Onboarding Progress

Progress indicator:

Account

Organization

HQ Setup

Executive Introduction

First Mission

Completed

Users always know how much remains.

Empty Organization Experience

If no missions exist:

Display:

- Welcome message
- Suggested missions
- Video tutorial (future)
- Quick-start templates

The interface should encourage action rather than appear empty.

Returning Users

Returning users skip onboarding.

They are taken directly to:

Executive Headquarters

The system restores:

- Active organization
 - Recent missions
 - Preferences
 - Notifications
-

Analytics

Track onboarding metrics:

- Sign-up completion rate
- Organization creation rate
- First mission completion rate

- Time to first value
- User activation rate

These metrics help improve the onboarding experience.

Future Enhancements

Support:

- Enterprise onboarding
 - Team onboarding
 - Industry-specific templates
 - AI-generated workspace configuration
 - Voice-guided onboarding
-

Success Criteria

The onboarding process succeeds when:

- Users create an organization in under five minutes.
 - Users understand the Executive Board.
 - Users complete their first mission.
 - Users experience measurable value before reaching the dashboard.
 - The onboarding flow maximizes activation and retention.
-

Conclusion

The HQ Authentication & Organization Onboarding Blueprint transforms sign-up into a guided product experience.

Instead of presenting an empty application after login, HQ immediately introduces users to their Executive Headquarters, demonstrates AI collaboration through a real mission, and delivers meaningful results before they reach the main workspace. This approach accelerates user understanding, strengthens engagement, and creates a memorable first impression that aligns with HQ's vision.
